

## RECENT STATE OF FLORIDA GOVERNMENT ACTIONS

**Changes to Recovery Measures** | Executive Order [20-192](#) | This order makes two significant changes to currently implemented phased recovery protocols. First, EO-192 removes the existing screening requirements for restaurant employees and replaces with a command for the Department of Business and Professional Regulation (“DBPR”) to implement screening protocols issued by the Centers for Disease Control and Prevention. No new order has yet been published by DBPR. Second, EO-192 removes the requirement that visitors to Florida from areas of significant community spread must self-quarantine.
