Transportation

OVERVIEW

"Jeff is a very good attorney, knowledgeable and is committed to client success."

- Chambers USA 2022

Jeff is a Shareholder in the firm's Tampa office with over 20 years of experience serving private and public sector clients throughout Florida in the areas of environmental, land development and administrative law. Jeff represents clients before federal, state and local environmental agencies on large development-related projects and contamination remediation projects throughout Florida.

As a former managing attorney in the South Florida Water Management District's Office of Counsel and a former senior attorney in the Florida Department of Environmental Protection's Office of General Counsel, Jeff brings a unique perspective on challenges related to environmental resource and consumptive use permitting, compliance and enforcement, water quality/water supply issues, sovereign submerged lands, and power plant siting.

Areas of Concentration

Environmental resource permitting, compliance, enforcement and litigation

Consumptive use permitting, compliance, enforcement and litigation

Water quality/water supply

Administrative law, DOAH litigation

Protected species/habitat conservation planning

Wetlands regulation and permitting

State lands and sovereign submerged lands

Hazardous waste and substances/contamination remediation

Brownfields Redevelopment

Cultural resources

Land development

Land use and zoning

Comprehensive planning and plan amendments

Power plant siting

Petroleum regulation

Mitigation banking

Coastal regulation, permitting and litigation

Utilities (wastewater, reuse, potable and irrigation water)

REPRESENTATIVE EXPERIENCE

Represented the first and leading medical cannabis company in the state of Florida in obtaining an Environmental Resource Permit in one week from initial contact using the Suwanee River Water Management District accelerated permit program. The permit was obtained for a 1,000,000 square foot automated growing facility (the largest, known cannabis growing facility in the world), and twelve 24,000 square foot grow facilities housed on a 93-acre property in Madison County, Florida.

Prevailed in state administrative proceeding (Florida Division of Administrative Hearings). Collier represented All Aboard Florida in an administrative hearing challenging an Environmental Resource Permit Modification issued by the South Florida Water Management District. Following a lengthy proceeding, including a two-week hearing, the presiding Administrative Law Judge issued a Recommended Order which found for All Aboard Florida on all issues and endorsed the permit under review. The permit was for a portion of the aforementioned express passenger rail system which will soon connect the four largest urban population centers in Southern and Central Florida. The Recommended Order, which was adopted by the South Florida Water Management District in its Final Order, contains the most thorough analysis to date on the issue of whether the first element of the public interest test permits consideration of non-environmental factors and provides more predictability and clarity as to the application of the public interest criteria.

Represented an affordable housing developer in obtaining a brownfield area designation for an affordable housing project in the City of Tallahassee during the COVID-19 pandemic. The team coordinated an in-person and virtual community meeting that included a team of consultants and members of the public as well as two virtual public hearings to obtain the brownfield area designation. The designation allowed the developer to take advantage of both state environmental clean-up programs and financial incentives.

Counsel in resolving an annexation challenge and an administrative challenge to a comprehensive plan amendment for a coalition of developer clients with projects at risk due to a long-running dispute between Alachua County and the City of Gainesville. Successfully negotiated with the County and the City for a global settlement allowing clients to move forward with projects that had been stalled for over six months and which were at risk of being delayed for another year or more.
